## SUMMARY

I am a passionate and results-driven Software Engineer with expertise in full-stack development, backend engineering, mobile app development, and cloud integration. Adept at delivering scalable, secure, and efficient solutions that enhance user experiences and drive company and business growth.

## WORK EXPERIENCE

### Coding Bootcamp: Mobile App Development

Nigerian Software Foundation

Jan '21  
Lagos, Nigeria

- Completed an intensive 16-week coding bootcamp focused on cross-platform mobile app development, with hands-on projects simulating real-world development environments.
- Developed a cross-platform mobile application using Flutter and Dart, featuring user authentication, dynamic UI, and API integration, deployed to Google Play Store for testing.
- Collaborated in a team of 4 to design and implement an online store app, integrating payment gateways and optimizing for Android and iOS compatibility.
- Utilized Git for version control, enabling seamless code integration and team collaboration across multiple development phases.
- Configured comprehensive CI/CD workflows using GitHub Actions to significantly enhance automation in build and testing processes, reducing deployment time by 15%.
- Acquired proficiency in HTML, CSS, JavaScript, and Java, applying these skills to enhance functionality in front-end and back-end development tasks.

### Software Engineer

Freelancer Fiverr

Dec '22 — Present  
Lagos, Nigeria

- Developed and maintained scalable web applications using Java, Spring Boot, flutter and React, improving system efficiency by 80%.
- Built and optimized RESTful APIs for seamless data exchange, reducing response time by 90%.
- Automated data processing workflows with Python and SQL scripts.
- Integrated cloud services (AWS, Firebase, Azure) to enhance system performance and achieve 99.9% uptime.
- Designed and implemented secure authentication systems using OAuth 2.0 and JWT, improving data security.
- Collaborated with cross-functional teams to deliver high-quality software solutions aligned with business goals.

## EDUCATION

Advance Diploma in Software Engineering, Aptech Computer Education

Jan '22 — Present  
Lagos, Nigeria

Cousera in Google, Google

Jan '23  
remote

- Create High-Fidelity Designs and Prototypes in Figma

## CERTIFICATIONS

Advance Diploma in Software Engineering, Google Coursera

## PROJECTS

### Employee Management System

- Built a CRUD-based employee management system using JDBC for MySQL connectivity.
- Implemented Servlets and JSPs to handle dynamic content and form submissions.
- Designed a role-based login system allowing different access levels for employees and managers.
- Deployed on Apache Tomcat ensuring smooth backend operations.

### Sky-Clock – Weather & Time App

- Created a Flutter-based mobile application that provides real-time weather updates and time zone conversions.
- Designed dark mode UI and implemented offline caching for enhanced accessibility and usability.
- Integrated APIs for accurate weather forecasting and global time tracking.

## SKILLS

**Programming Languages** Java, JavaScript, TypeScript, Python, Dart, C, SQL, HTML, CSS, C#

**Web Development Frameworks** React, Redux, Spring Boot, .NET, Django

**Development Tools** Git, Figma, Firebase, Postman, Jira, Docker

**Integrated Development Environments** IntelliJ IDEA, VS Code, Android Studio, RStudio

**Soft Skills** Problem Solving, Agile Collaboration, Software Architecture Design, Debugging, API Development, Cloud Integration, good communication skills
